Identified problem:

*"How might we tap into learners' passions and talents, and leverage that for greatness?"*

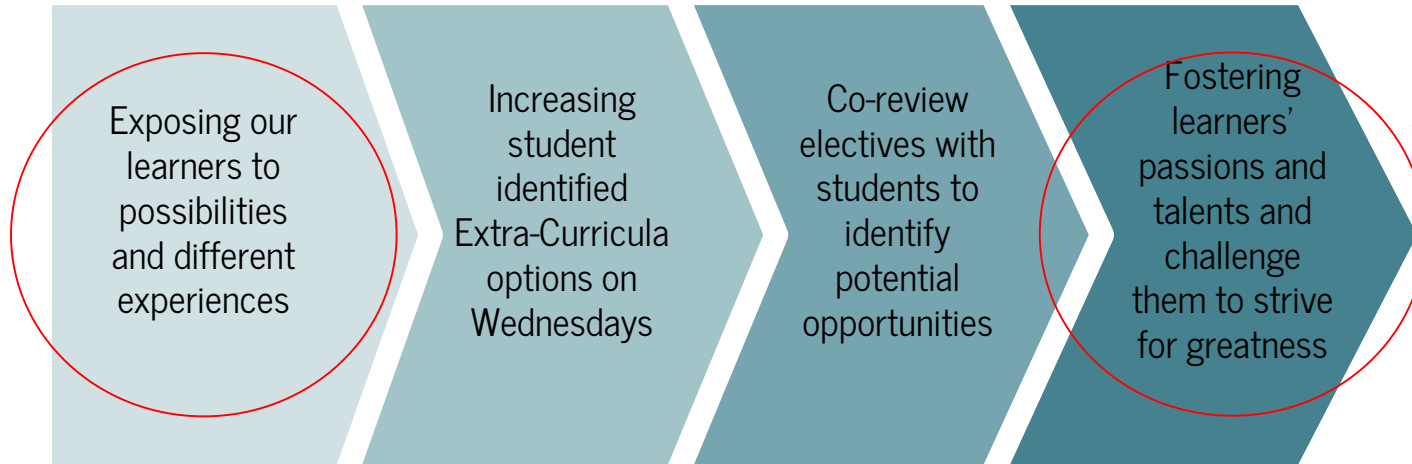

Barriers/further questions:

- *How can we identify passions & talents?*
- *We don't know what we don't know - some of you are yet to find your passion/talents*
- *How do WSS help students develop their passions?*
- *How can WSS provide exposure opportunities?*
- *What is greatness? How does this connect to value?*
- *How can this change the way WSS students experience school and how curriculum is designed?*
